

**CONTROLLING OFFICER'S REPLY TO  
INITIAL WRITTEN QUESTION**

**FHB(FE)133**

Question Serial No.

Head : 49 Food and Environmental Hygiene Department

2301

Subhead (No. & title) :

Programme : (1) Food Safety and Public Health

Controlling Officer : Director of Food and Environmental Hygiene

Director of Bureau : Secretary for Food and Health

Question :

Regarding the indicator for “blood samples taken from poultry for testing of avian influenza H5 antibodies”, the number of samples will decrease from 68 894 in 2008 (Actual) to 41 000 in 2009 (Estimate). What are the reasons for the decrease?

Asked by : Hon. WONG Kwok-hing

Reply :

The estimated number of blood samples for 2009 is contingent on the estimated number of live poultry to be supplied from the Mainland. The usual daily import limit on live chickens came down from 20 000 in January 2008 to the current 7 000 chickens. This in turn reduces the number of blood samples that needs to be taken.
