

Safety tips in relation to electrical work

- a) To engage a registered electrical contractor to carry out the electrical work including installation, inspection, testing, maintenance, alteration, repair and issue of certificate.
- b) To obtain a Work Completion Certificate (i.e. Form WR1) from the registered electrical contractor upon completion of the electrical work and before the fixed electrical installation is energised so as to confirm that the requirements of the Electricity Ordinance (Cap. 406) and its subsidiary regulations have been met.
