

DENGUE VECTOR CONTROL AND PREVENTION

Hey! Look! No
need for a magnifying
glass, you can feel that
we are formidable!

I have a slim body
with long legs and
a pin on my head
ha ha!

Who am I

People usually call
me *Aedes albopictus*.

Every day I go around with
a group of peers. Here we go
again!

We like to suck
human blood.

At a corner of the park, abandoned tires and empty lunch boxes and other garbage have been accumulated, and a person is littering casually.

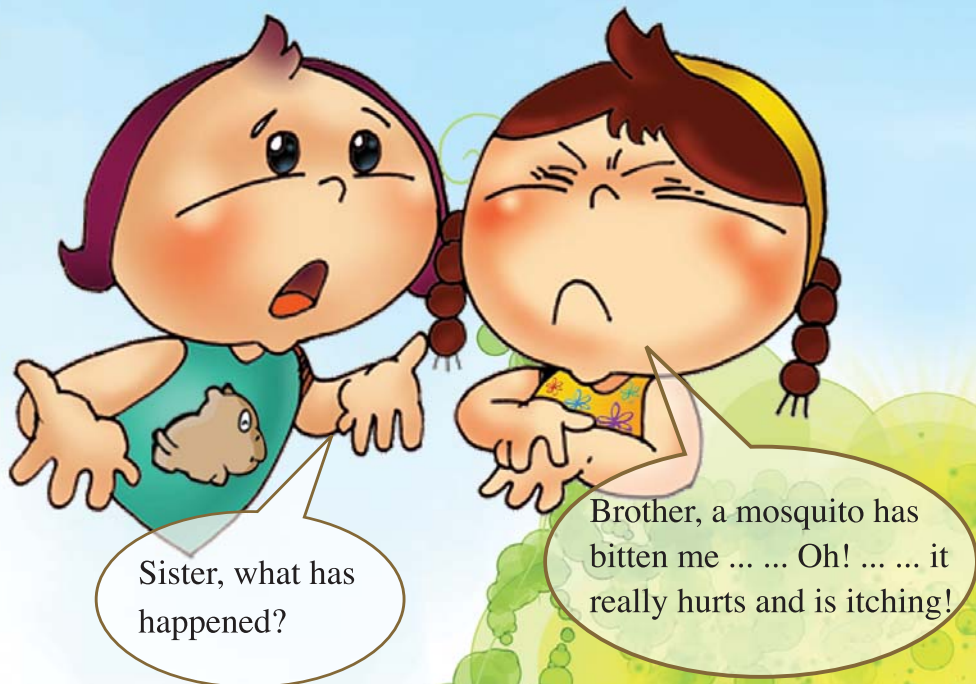

Empty lunch boxes
containing water are suitable
for me to lay eggs and breed
the next generation.
It's time to forage!

At another corner of the park, a group of children is at play.

Ha Ha
It's great fun!

Wait
everybody stops, we have
found preys. Come and
have a big meal!

They are going
to besiege us ...
Help! woo

Don't expect to
run away!

Run quickly!

Don't be afraid.
I will rescue you.

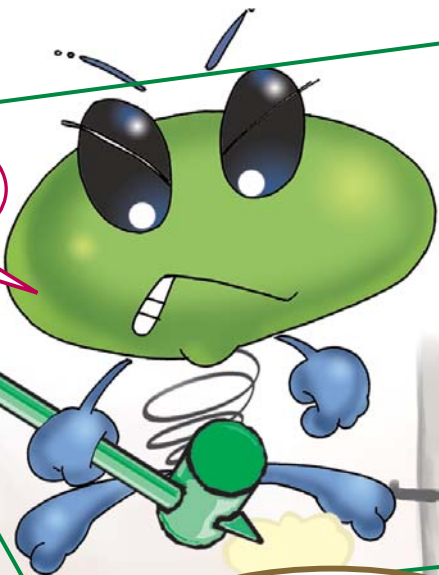

Who is he?

Oh! Mosquito Terminator?

I am the Mosquito Terminator. Let me eliminate them.

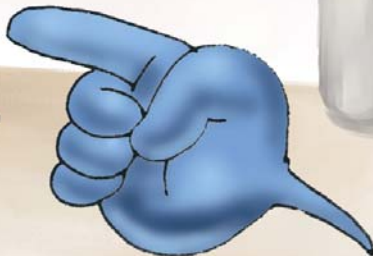

Hi! Nice to meet you!

Let me eliminate
all of you!

Mosquito Terminator is
coming. We must flee;
otherwise, we will die.
Oh! no

We cannot
escape...
Annihilated.

That's great! The mosquitoes have been eliminated.

Mosquito Terminator, what kind of mosquito is it?

When are they most active?

How do they breed?
