

Vector borne diseases in scrubby areas

Contracting vector borne diseases in local scrubby areas is uncommon but does occur. Some ticks and mites inhabiting the scrubby areas may carry vector borne diseases. **Scrub typhus** and **tick-borne spotted fever** are some of the diseases transmitted in the scrubby areas locally. Therefore, preventive measures should be taken when visiting the rural areas to avoid contracting these diseases.

Scrub Typhus

Scrub typhus is transmitted by Trombiculid mites. Symptoms include fever, headache and conjunctival congestion.

Biology of Trombiculid Mites

Trombiculid mites are small, only 1-2 millimetres in length, and red in colour. Some wild rodents may carry the larvae of the mites on their bodies.

The mite larvae bite and feed on animals, a behaviour conducive to disease transmission. On humans, the larvae congregate at areas where clothing is tight against the skin such as those around the waist or the ankles.

Prevention of Scrub Typhus

Scrub typhus can be prevented by:

- Applying insect repellent on the clothes or skin according to label instructions
- Wearing light coloured long sleeved clothes and long trousers
- Avoiding sitting or lying on scrubby areas
- Avoiding hanging clothes on scrubs or trees
- Disinfesting your pets regularly

Tick-Borne Spotted Fever

Tick-borne spotted fever is transmitted by ticks belonging to family Ixodidae and Argasidae. Symptoms include fever, muscular and joint pain.

Biology of Vector Tick

Mammals such as dogs and rodents may carry ticks on their bodies.

Most larval ticks cluster at tips of grasses or leaves and seek for their preferred animals. They pierce their mouthpart deep into the skins of animals or humans to obtain blood whilst transmitting the disease. Crushing of infective ticks or its faeces into human abrasions or the eyes could also be a way to have the disease contracted.

Prevention of Tick-Borne Spotted Fever

Tick-borne spotted fever can be prevented by:

- Applying insect repellent on the clothes or skin according to label instructions
- Wearing light coloured long sleeved clothes and long trousers
- Avoiding sitting or lying on scrubby areas
- Avoiding brushing the long grasses beside the paths
- Disinfesting pets regularly
- Do not feed stray dogs
