Hygiene Department

冷氣機受善排水四步曲

Four Steps to Proper Drainage of Air-conditioners

1

將冷氣機受善安裝，並安裝於水平位置

Install air-conditioners properly at a horizontal level

2

確保冷氣機膠喉管受善及穩固連接冷氣機底盤及大廈排水裝置或中央去水管

Make sure that the hoses of air-conditioners are properly and securely connected to the air-conditioner drip trays and then drainage facilities or communal drainage pipe of the building

> 確保膠喉管有適當的坡度，讓水能夠順暢流向排水裝置，避免積水；

Make sure that the hoses are set at a suitable angle to allow water to flow smoothly towards the drainage facilities and avoid accumulation of water;

> 確保膠喉管穩固地接駁於冷氣機及排水喉

Make sure that the hoses are securely connected to the air-conditioners and drainage pipes

3

檢查冷氣機排水管及排水托盤的堵塞物

Check the drainage pipes and drain trays of air-conditioners for blockage

> 去除內部的污垢和雜物，確保排水管暢通無阻

Remove the dirt and debris inside to make sure that there is no blockage in the drainage pipes

4

定期檢查及受善保養

Carry out regular checks and proper maintenance work
